CURRENT INTEREST ITEMS -- IIS SOFTWARE DEVELOPMENT

<u>ITEM</u>	<u>ACTION</u>
● ARIES - Has asked for a meeting to discuss: <ul style="list-style-type: none">(1) Use of Function Keys in PIRL and VEA(2) Methods of presenting Text Items and Fields(3) The use of repeating fields as record selection criteria(4) Question of whether enough FASTRAND space will always be available to hold all pages of any report	Schedule a meeting with ARIES right after the [] visit (5 - 6 November) at which time we should be in a better position to discuss matters relating to CRT's.
● ARIES - Has for some time now alluded to the fact that our current and projected Sort Programs will not provide a practicable solution to their sorting requirements.	<ul style="list-style-type: none">(1) We have already provided a SPB briefing describing Sort Programs under development(2) SPB - reluctant to consider any change to current Sort Program being developed until it's operational(3) ARIES asked to submit a paper outlining their specific requirements and an estimate of manhours/time/costs to develop a Sort tailored to their needs
● ARIES - Expects to submit detailed program design specifications during November (for NPIC review/approval) for the following Programs: PIRL PLP DEN	We must muster our resources to perform this review. (SPB has offered some help in performing the above actions.)
● ARIES - Will also submit a preliminary functional description of the Batch Query Language for NPIC review.	Same action as above.

NPIC N 4236 (10/68)
